Archive Report 2024/2025

Digitization of our baptism records is progressing slowly with help from dedicated volunteers who give their time so willingly to enable us to make progress. This could speed up if more help was available, so we welcome those who are interested in giving a little time on a regular basis.

Meantime the storage of the archives is growing as gradually more records are accessed for research needs and brought downstairs and not returned to the shelving in the tower.

The need to find whakapapa from historical records is becoming increasingly important to families and it is heartening to realize how resourceful and essential our archives have become as most weeks we have more requests for information.
